

Light Pollution Sub-Committee minutes 5/15/14

Ellen Ott and Cristeen Custer attending.

Meeting was called to order 4:43 by Ott.

The open meeting law requirements were met.

Move to adopt agenda as published Ott and 2nd by Custer.

Move to approve minutes Custer 2nd by Ott.

Air committee drafted a final report and Ott discussed that report with the committee.

Question was raised as to whether footnotes should be included. This is a question for the larger committee.

Can we get light pollution map. Custer will contact EQB board to see if we can get the original of their image because that image includes Trempealeau County and shows that there are still significant areas in the county that are not impacted by light pollution.

The committee also agreed to include lighting zone graph; and background from EQB study.

Discussion ensued on the final recommendations. Ott noted that we must ask the question based on a risk/benefit.

Can we get data on the sale price for property has sold for mine use?

Assignments: each member will draft background, results, and recommendations from their study materials. Drafts to be complete by June 9.

Exchange drafts via email and then determine when next meeting should be held. We will need to incorporate survey results also.

Move to adjourn at 6:04 by Custer 2nd by Ott.
