

TREMPEALEAU COUNTY

Moratorium Committee Minutes – Radon Sub Committee

Date: Friday, November 15, 2013
Time: 9:00 a.m. – 11:00 a.m.
Location: Trempealeau County Courthouse – UW Extension Office

Discussed at the Radon Work Group meeting were three main points:

1. Grants were discussed through the health department. The question was asked in regards to money for testing houses and how the money was allocated. Was allocated or requested for a specific project or was it able to be moved around?
2. Is there data of radon levels in the county from pre-mining days to compare to now that we have mines? Is there sufficient data to do a good comparison.
3. The review of literature and the email string with state geologists suggests that there should not be any effect on radon in people's homes from open pit mining.
